AC
AC encoder
AC encoder
AC encoder
full history
subagent trajectories
top-200 docs (high recall)
precomputed document KVs
(b) Three write depths
text token
written by AC
derived
Input Embeddings
L3
L2
L1
emb
AC vectors replace the token embeddings; every layer above is derived from them
Hidden Residuals
L3
L2
L1
emb
AC vectors are also added to the hidden states of selected layers
All-Layer KVs
L3
L2
L1
emb
AC keys and values are written into every layer's cache; no forward pass is needed
token positions →
